Zaki + Partners Sdn Bhd

Kuala Lumpur

Job Description:

This candidate would be positioned under the Research and Consultancy Department. He / She is expected to be a highly self-motivated individual, team player with excellent communication skills and actively participate in both departments and company's discussions and events.

The candidate is expected to be involved in works ranging from the collection of data, conducting market and financial analysis, upkeep and upgrade of database from time to time, and producing reports and publications.

Responsibilities:

- To gather, process and analyse data collected and determine marketability of the prospect clients' proposed development.
- To conduct feasibility study, market intelligence research through analysing demands, trend & pricing of various development components.
- To be involved in undertaking market surveys and analyse data findings.
- Jointly ensure all data bank updated and well maintained.
- To keep update on the relevant market updates relating to real estate industry and local economic performance.
- To produce market insight and feasibility study reports and publications.

Requirements:

- Candidate must possess at least Bachelor's Degree/Post Graduate Diploma/Professional Degree in Property Development/Real Estate Management or equivalent.
- Must be a team player with strong interpersonal skills and good working etiquette.
- Excellent written and communication skills.
- Strong numeric and analytic skills with attention to details.
- IT / Tech savvy to manage and maintain database.
- Candidate with related work experience of at least 1 Year is preferred; fresh graduate also welcome to apply for this position.
- Possess own transport with a legitimate driving license.

Interested candidates are welcome to apply for this position. Kindly email your CV and expected salary to [Research & Consultancy Department](#).
